

Dear automotive enthusiast,

thank you for your interest in our product and welcome in our world of street and motorsport fascination.

We highly appreciate your attention and we hope you will appreciate the attention we dedicated to our vehicle and hospitality we would be happy to provide to satisfy your personal expectations and ideas. To continue the good reputation, we are glad to bring you some more useful and updated information.

Who We Are

K-1 ENGINEERING, s.r.o. (further K-1 ENGINEERING) is a low volume sports car manufacturer based in Bratislava/Slovak Republic, a region known for the highest concentration of automotive manufacturers such as Volkswagen, Ford, Kia, Peugeot, Citroen, PSA and lot of other automotive industry suppliers. K-1 ENGINEERING was established in 1991 and shortly became well known for automotive styling design, development and hand crafted manufacturing with high attention to details. Thanks to these abilities, at 2006 K-1 ENGINEERING became a member of financial group CI HOLDING, akciová spoločnosť.

K-1 ATTACK ROADSTER

“K-1 ATTACK“ is a registered brand of K-1 ENGINEERING and represent the rebellion of few fresh and creative young people strongly related to automotive passion and competition against boring global automotive world. Thanks to futuristic design combined with the latest in sophisticated technology and solicitous craftsmanship, this product obtained a great development support from Ford Motor Co. and direct factory access. Extremely stiff tubular space frame integrating powerful sporty Euro-4 passed powertrain in front of the rear axle, dressed in light radical jacket is the most extraordinary attention-getter you can ever meet on the street. Maybe it is surprising, but K-1 ATTACK ROADSTER is not only meant for free time and fun. Lot of trunk space, leather upholstery, adjustable seats and pedals, power steering, power brakes, power mirrors, multimedia system, automatic air-conditioning system and much more, gives you excellent opportunity to use the K-1 ATTACK ROADSTER as daily driven automobile.

Electro/Diesel Hybrid

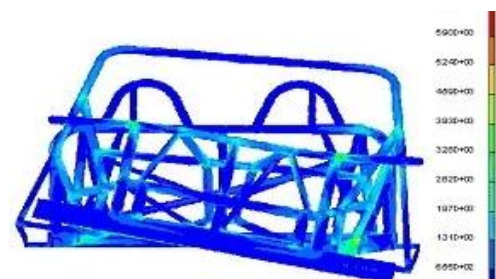

Considering the latest fuel alternative trends in automotive development, we are proud to mention the victory of our special Hybrid-Attack, taking the 1st place in the international “Tour de Sol 2005” contest in front of all other automotive serial producers. Extremely light carbon fiber body, combined with 360hp, soya beans superclean biodiesel/electric powertrain with superior acceleration and fantastic consumption of 4 liters immediately became the world fastest electro/diesel hybrid vehicle.

Dimensions

• Engine	3.0 V-6, 242hp/300Nm	• Front Rotors	Ø330 floating, drilled, vented
• Gearbox	short 6 speed manual	• Front Calipers	double side 4 pistons alumin.
• Length	4040mm (159,0inch)	• Rear Brakes	Ø310 floating, drilled, vented
• Width	1850mm (73,2inch)	• Tires Front	215/45 ZR17” soft comp.
• Width/mirrors	1980mm (77,9inch)	• Tires Rear	265/35 ZR18” soft comp.
• Height	1095mm (41,5inch)	• Wheels Alu.	Fr. 8x17" / Rr. 9x18" ET35
• Wheel Base	2425mm (96,0inch)	• Layout	mid.Engine, rear wh.drive
• Weight	992kg (2182lbs)	• Load distribt.	Front axle 48%, Rear 52%
• Trunk capacity	203liters (roof storage)	• 0-100 km/h	4.9 sec. (ST-V6)
• Fuel tank cpct.	43liters, (5l reserve)	• Top Speed	250 km/h (electr.limited)

Frame

The custom made tubular space-frame chassis was sophisticatedly designed and lately modified with extra attention to torsional rigidity and safety. It would take about 5500lbs of force in torsion to make the chassis deflect just 1inch. Full race chassis reinforcement with steel roof will handle about 5000lbs of force to deflect the chassis to the same value.

Racing

In regards to running serial K-1 ATTACK production, our development department introduced in 2007 the special Attack Racing Edition equipped with two big turbos and total engine and management upgrade. This extremely light and powerful “adult go-kart” provides with its dramatic power 450hp/500Nm and 980kg a professional racing experience for “café racers“ as well as for serious competitors. The third place in Central European Zone championship 2008 does not need any further comments. The racing edition is subject of sale, or renting as well.

Is there any reference?

Yes, we did manufacture up to date over 150 Attack vehicles, mainly sold as pre-build stage to United States, however our Roadster is to be spotted almost in any European country as well. Since 2007, the biggest demand was coming from BENELUX countries and Germany.

Confidence & Identity

Each vehicle being assembled by K-1 ENGINEERING is strictly tested and comes with a detailed discharge list checking functionality of all components and driving conditions. Each K-1 ATTACK ROADSTER is equipped, besides a regular identity tag, also by K-1 ENGINEERING identification plate of origin stating engraved names and signatures of workers who handcrafted each particular automobile. Later, you have nice opportunity to ask for actual people taking care of your vehicle. They know it best.

Colour Scheme

K-1 ATTACK ROADSTER could come in virtually any color combination. Due to our experiences and delivery time reasons, we would be pleased to recommend the most suitable harmonization.

Exterior is available in 8 rich paint shades, in commutation with several carbon-fiber body panels:

Black / Yellow / Red / Black Metallic / Red Metallic / Silver Metallic / Blue Metallic / Orange Pearl Metallic

Interior materials are gently selected to match the best quality variations of many color carpeting, several tones of cotton stitching and four colors of genuine fine leather: Black, Sport-Red, Saddle-Brown and Bone-White.

Model Types & Price List

K-1 ATTACK ROADSTER could be build in many versions, depends on optional equipment and modifications. All models are equipped with V-6 engines and similar design of frame and body. For detailed price list including exact optional equipment list, please contact K-1 ENGINEERING team.

Warranty

Your new K-1 ATTACK ROADSTER is covered by one or alternatively two years warranty ex works. The length of factory coverage depends on model, country and purpose of use.

Test Drives, Showroom & Factory Tours

Test drives are available for groups or individuals. After signing for a test drive, depending on the number of persons, we will propose you the closest available date, exact day schedule and arrange all services. Factory tours are available. Our showroom is daily opened in Bratislava, Slovak Republic.
